DETAILED ACTION

Continued Examination Under 37 CFR 1.114

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 10/11/2006 has been entered.

Drawings

The drawing was received on 11 October 2006. This drawing is acceptable.

EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Mr. Lawrence A. Hoffman on January 11, 2007.

The application has been amended as follows:

Claim 1, line 7, "at least a portion" has been changed to --at least one portion--; lines 8, 11 and 12 "at least the portion" has been changed to --at least one portion--; line 12, "meet" has been changed to --are located on--.

Claim 11, line 7, "at least a portion" has been changed to --at least one portion--; lines 8-9, 10 and 11 "at least the portion" has been changed to --at least one portion--; and line 11, "meeting" has been changed to --are located on--.

DPS
Specification, Page 7, line 5, deleted "and"; Page 7, line 7, after "scale" added - - and - -
Page 7, after line 7, added- - Fig. 3 shows a flanged end with varying concavity or radius of curvature. --.

DPS
Specification, Page 8, after line 4, add the following paragraph - - The concavity of surface 10 in Fig. 2, i.e., the radius of curvature, is substantially constant. In the alternative, surface 10 may have a varying radius of curvature, as illustrated in Fig. 3. Here, $R_1, R_2 \dots R_n$ need not be equal. --.

Allowable Subject Matter

Claims 1-8 and 10-14 are allowed.

The following is a statement of reasons for the indication of allowable subject matter:

With respect to claims 1-8 and 10-14, the prior art of record does not show or suggest that at least one portion of the first end surface of the flanged member in an unstressed condition is concave in a radial direction, such that the at least the portion of the first end surface is curved and defined by a concave curve function and a proximal point on the at least the portion of the first end surface and a distal point of the at least one portion of the first end surface are located on a plane inclined in the radial direction of the flanged member (claims 1 and 11, lines 7-12). Buono (US 2,940,779) only teaches a flange member in unstressed condition having a first end portion is formed from multiple linear lines, and there is no reason to combine Buono (US 2,940,779) with other prior art of record
